DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species: A - figures 1-7; B - figures 7-9; C - figure 10; D - figures 11-14; E - figures 15a-b; F - figures 16-18; G - figures 21-25; H - figure 26; I - figure 27a; J - figure 27b; K - figure 28; L - figure 29; M - figure 20; N - figures 31a-32; O - figures 33a-34; P - figure 35a-36; Q - figures 37a-c; R - figures 38-39; S - figure 40a-b; T - figure 41; U - figure 42; V - figure 43; W - figures 44a-45b; X - figure 46; Y - figure 47; Z - figure 48; AA - figures 49 and 50; BB - figures 51 and 52; CC - figure 53; DD - figure 54; EE - figure 55; FF - figures 56 and 57.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 50 appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3676

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Response to Arguments

2. The applicant should be aware that the current action is non-final and should therefore respond accordingly to the Office Action within the statutory time period of 30 days from the mailing date of this communication.

The applicant's corrections to the abstract have overcome the objection to the abstract noted in the previous office action and no further modifications are needed to the abstract at this time.

In response to applicant's question, claim 4 was cancelled and the procedure continues on from the point of the latest amendments to the application (i.e. August 13, 2002).

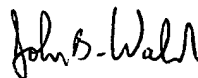

All previous prior art rejections have been withdrawn at this time in lieu of the election of species requirement. The applicant must select one of the above identified species and a listing of all claims belonging to that species.
